

Majority Element 82

[Problem](#)[Submissions](#)[Leaderboard](#)

RATE THIS CHALLENGE

Given an integer array of size n , find the majority element. A majority element is an element that appears more than $\lfloor n/2 \rfloor$ times.

If a majority element exists, print it. Otherwise, print -1. Complete the function `majorityElement` that takes the following parameter:

`int arr[n]`: an array of integers Returns `int`: the majority element if it exists; otherwise -1.

Input Format

The first line contains an integer n , the number of elements in the array. The second line contains n space-separated integers.

Constraints

$1 \leq n \leq 10^5$ $-10^9 \leq arr[i] \leq 10^9$

Output Format

Print the majority element if it exists; otherwise, print -1.

Language

C

```
5
6 void majorityElement(int arr[],int n){
7     int i = 0,j = 0;
8     for(i=0;i<n;i++){
9         int count = 0;
10        for(j=0;j<n;j++){
11            if(arr[i]==arr[j]){
12                count++;
13            }
14        }
15        if(count > n/2){
16            printf("%d ", arr[i]);
17            return;
18        }
19    }
20    }
21    printf("-1");
22 }
23 int main() {
24     int n;
25     scanf("%d", &n);
26     int a[n];
27     for(int i=0;i<n;i++){
28         scanf("%d", &a[i]);
29     }
30     majorityElement(a, n);
31     return 0;
32 }
```
